

**REMARKS**

The foregoing amendments incorporate into the specification of the present application changes specified in a certificate of correction issued to Patent No. 6,046,968 on October 26, 2004. These amendments are intended to present no changes to the specification other than those specified by the above referenced certificate of correction.

A supplemental declaration has been provided that identifies at least one error relied on to support the reissue application. Specifically, the original patent failed to claim a "clock reference structure having a spatial frequency that is within the spatial frequency spectrum of the data."

It is believed that no extensions of time or fees are required, beyond those that may otherwise be provided for in documents accompanying this paper. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required (including fees for net addition of claims) are hereby authorized to be charged to Hewlett-Packard Development Company's Deposit Account No. 08-2025.

Respectfully submitted,

/David M. Wilson/
